

**Marketplace Step Therapy Program**

Step Therapy requires you to have tried a First Line medication from the same therapeutic class as the brand name drug within the previous 365 days. If your prescription history does not indicate that a first line medication was tried, the brand name medication will not be covered. The Step Therapy Program does not apply to you if you are already taking the brand name medication. Please note that the brand name medication will be covered at the appropriate benefit level once a first line medication has been tried and found to be ineffective.

The chart below lists the medications included in the Step Therapy Program:

<b>Drug Name</b>	<b>First Line Medications</b>	<b>Criteria</b>
<b>Allergy-Asthma</b>		
<b><u>Antihistamine, Inhaled Nasal</u></b> Azelastine 0.15% NS, Olopatadine NS	Azelastine nasal spray 137mcg/spray	Must have tried a medication in the 2 <sup>nd</sup> column within the last 365 days
