

Diabetes Prevention Education

About the Education

If you are an AultCare member and at risk for developing diabetes, AultCare's diabetes prevention education is available to you at no additional cost.

In this program, an AultCare registered nurse can provide you with the guidance and resources you need to lower your risk for developing diabetes. The nurse will provide coaching, support, and answer any questions you have regarding your condition. Educational materials are sent to your home and will help guide you on healthy eating and exercise, as well as help you understand factors that trigger unhealthy habits.

During the first six months of the program, the nurse will help you focus on healthy eating habits to decrease your weight/body mass index by 5-7% and encourage participation in an exercise program with your physician's approval. During the next six months, the nurse will provide education to help maintain weight loss and motivation.

Professional Support

In this program, you are assigned a registered nurse who will provide support in monitoring your risk for developing diabetes. Your nurse can answer questions you have regarding your condition.

Quantifiable Goals

A nurse will provide you with healthy eating and exercise goals to better manage your risk for developing diabetes.

Educational Materials and Resources

We have educational materials and resources available to provide you with the information you need for quality care.
